SUMMARY

Highly motivated and detail-oriented junior front-end developer with experience working with Javascript, ReactJS, HTML/CSS, and various frameworks. Skilled in contributing to a highly collaborative work environment and finding solutions to meet business needs. Strong ability to code to deliver a quality product.

EMPLOYMENT

mobileLive Inc.

Junior Software Development Engineer · Jan. 2022 to Current · Toronto

- Worked with the Rogers Merchandising team to perform A/B testing for Rogers and Fido Frontend portals to compare two versions of a webpage or app against each other to determine which one performs better.
- Developed interactive tools using React on the front-end, along with using styled components for styling, to meet project requirements, goals, and desired functionality for the TELUS project.
- Utilized Contentful to map all the fields on the front end to modify these fields without much technical help.
- Implemented enhancements, performed code reviews, and bug fixes that improved web functionality and responsiveness.
- Created and maintained the Sales Order tool for Telus Internal team by creating multiple pages and their designs using the Telus design system.
